TECHNICAL DESCRIPTION, ADULTS:

TECHNICAL DESCRIPTION, IMMATURE STAGES:

ID COMMENTS: According to Klots (1970): In color and pattern it is not always easy to distinguish from the likewise common, widespread *X. panalope*, but its markings tend to be a grayer brown and wider and more diffuse; while *panalope* tends to have the intervenous dark line beyond the cell, in cell Mi, lighter than the adjacent intervenous dark lines.

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT:

FOOD: Host plants are apparently unknown.
