ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT:

FOOD: Larvae have apparently not been observed in the wild, but larvae reared from eggs feed on birch, blueberry, and cherry (Wagner et al., 2001). A long list of woody species are mentioned on BugGuide (accessed 2010-01-02) for this species but without any information on whether they were observed in the wild or reared (only one larval photo is shown, representing a captive rearing)

OBSERVATION\_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G5 S3S4

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
