ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Coastal Plain records come from the edges of pocosins and other wetlands. Mountain records come from both alluvial forests and mesic slopes, including some at high elevations. In both areas, the distribution of the moth strongly parallels the distribution of Clethra.

FOOD: Larvae feed on Clethra, with Clethra alnifolia confirmed and C. acuminata presumed based on distributional patterns (Wagner et al., 2011)

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: GNR S4S5

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
