

Spragueia dama Southern Spragueia Moth

FAMILY: Noctuidae SUBFAMILY: Acontiinae TRIBE: Acontiini
TAXONOMIC_COMMENTS:

FIELD GUIDE DESCRIPTIONS: Covell (1984)

ONLINE PHOTOS:

TECHNICAL DESCRIPTION, ADULTS:

TECHNICAL DESCRIPTION, IMMATURE STAGES:

ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Wagner et al. (2011) list fields, waste lots, and other open habitats as used by this species. However, almost all of our records come from pond, lake, and stream shorelines, which would be more consistent with an association with *Sida spinosa* or other members of the Mallow family.

FOOD: Wagner et al. (2011) report finding two larvae on Bindweed but other possible members of this species on *Sida spinosa*

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G5 S3S4

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
