

Checklist of the Dragonflies and Damselflies of North Carolina

Printed 2018-04-27

Date: **County:** **Site:** **Comments:**

This is a listing of the 187 odonate species known to occur in the state. Listed after each species is its State Status, Federal Status, and Abundance Level in each of the four regions: Mountains (M), Piedmont (P), Sandhills (S), and Coastal Plain (C).

State Status (as identified by the NC Natural Heritage Program): [SR = Significantly Rare] [W = Watch List]

Federal Status (as designated by the US Fish & Wildlife Service): [FSC = Federal Species of Concern]

Abundance Level: [A = Abundant] [C = Common] [U = Uncommon] [R = Rare] [X = Casual; one to several records]

[(L) = Localized - occurs in less than 20% of the region] [H = Historical occurrence only, i.e., no records in over 20 years]

[* = Essentially restricted to coastal habitats] [? = Of uncertain occurrence in the region] [Blank = Not recorded in that region]
